SAVING LIVES OUR TOP PRIORITY

Oxygen support, COVID Hospitals and more

When the second wave of the COVID struck, we cannot claim that we were fully prepared, but we were equipped to face it. BPCL Kochi Refinery team came out in full force to deliver the urgent requirements for both the employees and the society. After the CFLTC for employees, the 1500-bed COVID hospital with direct oxygen supply, one of the largest of its kind in the country, was put up in record time. Oxygen supplies were arranged on war footing and medical support was extended through various channels.

In association with the District Administration, Local Panchayats and other statutory bodies, Kochi Refinery was in action like a wild octopus. The team had to think and act in such coordination, as there was not a moment to lose for a mission of the highest order for saving lives. Our kudos and respects to the health angels who supported all through.

In this edition of *JwalaDhwani Mini*, we bring you an update on the actions taken to curb the spread of the pandemic during the initial phase, the lockdowns and also the second wave. The commitment of Oil PSUs stands tall all along and our Refinery kept running 24 x 7 to fuel and fulfill every demand.

The fight against the pandemic is still ON and there is only one mantra to whisper or shout: *Stay Safe. Stay Healthy.*

Warmly,
Editor

OIL, STEEL INDUSTRY SETTING UP MORE THAN 10,000 OXYGENATED BEDS TO FIGHT SECOND COVID WAVE

From augmenting the oxygen production and supply to establishing Covid care facilities across the country, the oil and steel industry has been helping out in the war against Covid. As per a report by these two ministries, they together account for producing and supplying around 6,650 MT of medical oxygen out of the daily allocation of 10,000 MT in India. In addition, the 13 oil PSUs are establishing more than 100 oxygen generation plants at different hospitals across the country.

IN RESPONSE TO SECOND WAVE

Ministry of Petroleum and Natural Gas, Government of India
14 May · 🌐

Continuing MoPNG's efforts to strengthen India's response to the second wave of the #Covid19 pandemic, [Bharat Petroleum Corporation Limited's](#) Kochi Refinery will provide free Oxygen, power and water to the mega Covid care facility coming up adjacent to the refinery at Ambalamugal in Kerala.

The Covid care facility will have 100-beds connected with oxygen supply through a dedicated stainless steel pipeline from the refinery in the 1st phase, which will be later expanded to 1500 oxygenated beds. This is one of the biggest Covid care facilities being set up in Kerala.

Kochi Refinery has ramped up its oxygen production facility to complete the entire activity of supplying life-saver oxygen to the Ambalamugal Covid facility in 5 days. Our oil & gas companies are ever committed to respond to the call of the country and are working to save lives.

Oil and Steel Cos helping Combat Covid: Pradhan

Minister inaugurates a 500-bed Covid-19 hospital in Panipat

Kumar.Anshuman
@timesgroup.com

New Delhi: From augmenting the oxygen production and supply to establishing covid-care facilities, the oil and steel sector companies have been helping out in the war against Covid. As per a report by these two ministries, they together account for producing and supplying around 6,650 MT of medical oxygen out of the daily allocation of 10,000 MT in India. In addition, the 13 oil PSUs are establishing more than 100 oxygen generation plants at different hospitals across the country.

The information was shared by Dharmendra Pradhan, union minister for steel and petroleum, in a series of social media posts.

"Under the leadership of PM Narendra Modi ji, the steel and petroleum industry have rallied together and are making every effort to help India combat the second wave of the Covid19 pandemic better and stronger," Pradhan wrote.

With demand for medical oxygen growing every day, the public and private sector steel plants have ramped up their daily production capacities. The production was 538 MT per day on April 1 which has now been increased to 4,278 MT on May 12. The steel plants also have a storage of 25,000 MT of oxygen currently which is supplied to states as per demand.

The oil PSUs are playing a major role in offering logistical support in carrying the oxygen to different states. The PSUs have contracted 207 ISO tankers with a capacity of 4214 MT to augment the last mile deliveries of oxygen. These companies have also placed orders for high-capacity oxygen compressors for filling oxygen cylinders. Currently, all these tankers are being used to supply oxygen to 12 states.

Pradhan on Sunday was in Panipat to launch a 500-bed covid care hospital which has been set up with the help of IOCL.

UNITING TO FIGHT CORONA

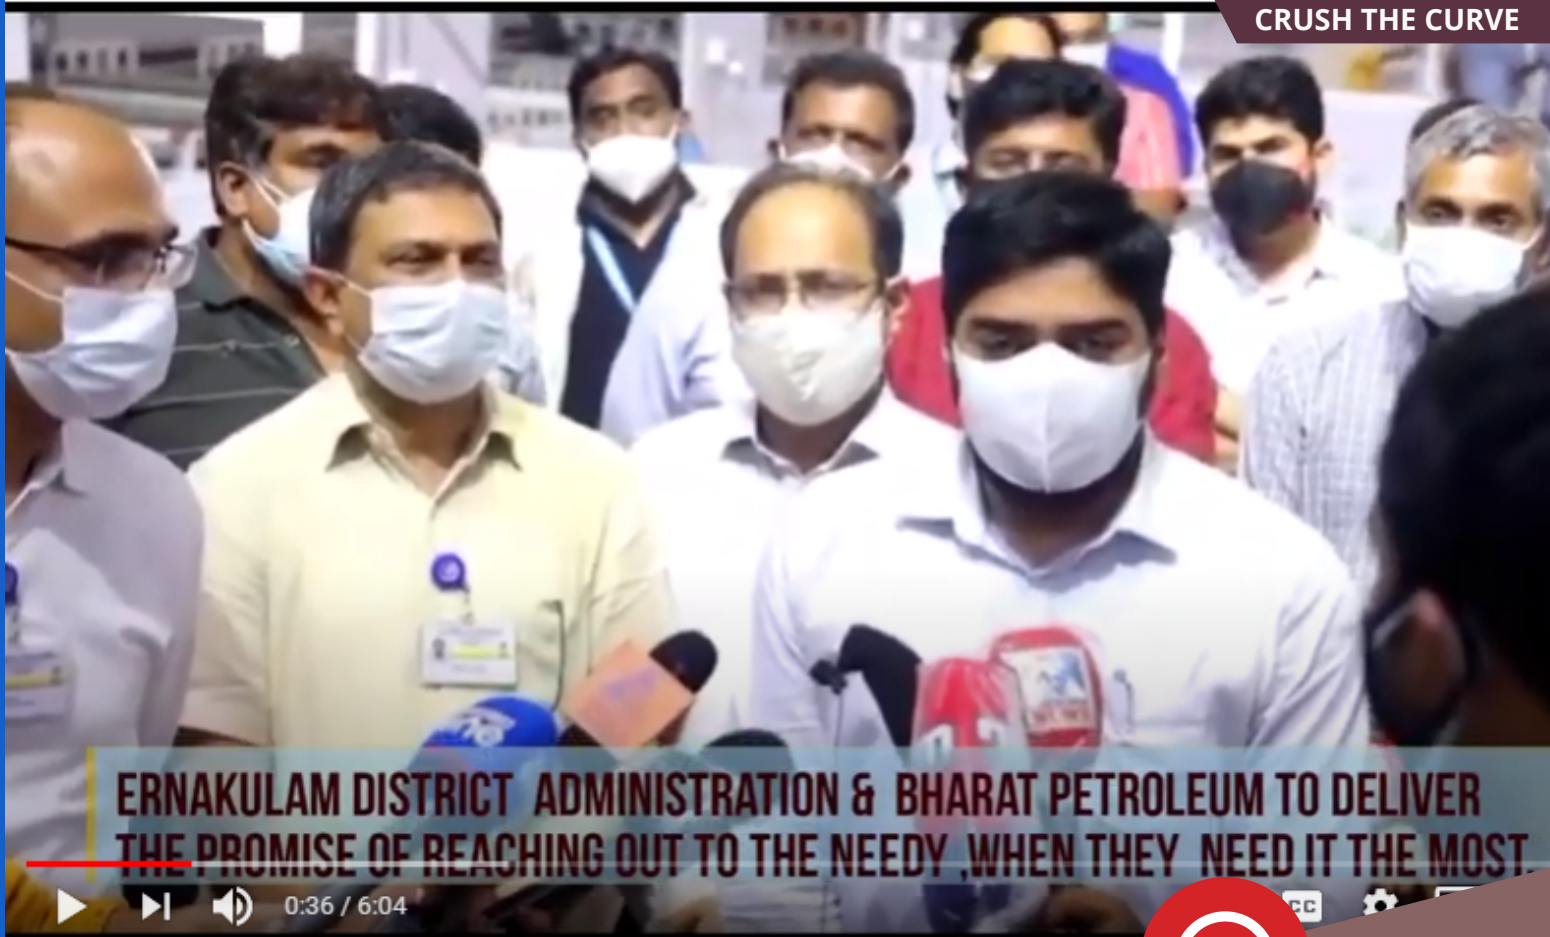

Centre undertakes multiple initiatives to enhance oxygen availability, distribution & storage infrastructure.

The steps undertaken, focus on entire oxygen supply chain including the efforts for improving oxygen production, enhancing tanker, availability, and more.

SAVING LIVES OUR TOP PRIORITY

AMBALAMUGAL GOVERNMENT COVID HOSPITAL WITH DIRECT OXYGEN SUPPLY FROM BPCL KOCHI REFINERY OPENED TO PUBLIC

THE MAKE-SHIFT HOSPITAL WAS SET UP BY A TECHNICAL TEAM OF KOCHI REFINERY ALONG WITH THE DISTRICT ADMINISTRATION TEAM IN LESS THAN 7 DAYS BRAVING THE ONSLAUGHT OF THE CYCLONE TAUKTAE AND SEVERAL OTHER DAUNTING OBSTACLES OF THE COVID LOCKDOWNS.

Ambalamugal Government COVID Hospital having a total of thousand five hundred beds with direct oxygen supply from BPCL Kochi Refinery, neatly spaced and equipped for isolation as per protocol has been opened to the public. The COVID hospital set-up by the Government of Kerala in the Kochi Refinery premises is a well-planned facility for meeting the unique emergency that has risen in the wake of the second severe spike of COVID-19. Once again the Ernakulam District Administration and BPCL have partnered to deliver their continuous promise of reaching out to the needy, when they need it the most.

The first patient was received at the facility on 17 May 2021. Earlier, at the closure review with the BPCL team at Kochi Refinery on 15 May 2021, the Ernakulam District Collector, Mr S Suhas, IAS, appreciated the Refinery team for the full support extended to Government of Kerala right from providing the space for the COVID Hospital facilities in the two schools in the Refinery premises to the dedicated Oxygen supply to individual beds and also for the readiness to deliver uninterrupted power and water supply.

The make-shift hospital was set up by a technical team of Kochi Refinery along with the District Administration team in less than 7 days braving the onslaught of the Cyclone Tauktae and several other daunting obstacles of the COVID lockdowns.

BPCL supplies Oxygen and Utilities to mega make-shift COVID centre set up at Kochi Refinery premises

SANJAY KHANNA
Executive Director (Kochi Refinery)

0:08 / 2:26

WATCH VIDEO

In addition to the direct oxygen support to the make-shift hospital, BPCL is also focusing on other modes of oxygen supplies from Kochi Refinery with a well-laid out plan for the same. "In the challenge to fight the pandemic tooth and nail, we are totally in it to address the distress call for Oxygen that's coming in from so many different corners. We intend to strengthen support through liquid Oxygen supplies, gaseous oxygen supplies through pipelines and provide Oxygen generators in hospitals. We want to reach out Oxygen as much as we can. Saving precious lives, that's BPCL Kochi Refinery's top priority for now," said Mr. Sanjay Khanna, Executive Director (Kochi Refinery). "This is the first of its kind facility where Oxygen will be supplied directly from a process unit. We have stopped all the Oxygen usages temporarily within the Refinery and kept the facility dedicated for medical purpose only," Mr. Khanna, added.

During the peak of COVID 19 in October 2020, BPCL Kochi Refinery along with M/s Air Products initiated the supplies of medical grade liquid Oxygen. With this second wave in April 2021, BPCL has resumed medical grade liquid oxygen supplies from Kochi Refinery to government hospitals and also to CIAL Covid Centre, Aluva Taluk Hospital and PVS Covid Centre.

"Considering the dire emergency, a dedicated one kilometer long Oxygen line has been established to the COVID hospital from the Oxygen plant in the FCC unit of Kochi Refinery. The challenging job was executed by a dedicated team, who worked round the clock and completed the entire activity in less than 7 days," said Chief General Manager (Operations), Mr. Chacko M Jose. "The stainless steel pipeline complies with all safety measures and has the facility for connecting the backup arrangement. Through this line alone we can supply up to 15 tonnes of Oxygen per day," detailed Mr. Chacko.

"Last year, as advised by the Central and State machinery, BPCL initiated the COVID first line treatment centre (CFLTC) at the Refinery school. The CFLTC continues to operate with the support of the medical team from M/s Sudheendra Mission Hospital. The school auditorium that has now been converted to the Govt. COVID hospital is only a block away from this CFLTC," said Mr. Kurian Alapatt, Chief General Manager (HR) who is in charge of these facilities.

"This oxygen supply system by BPCL, through pipelines, trucks and the oxygen generators for general hospitals are tokens of BPCL's undying commitment to the immediate society and to the nation at large. BPCL has been the first to rise into action at each and every call of catastrophic distress in Kerala. Be it the floods or the pandemic, we are committed in our contributions to the social development of the State as much as we are in our responsibilities as a leading Refiner," Mr. Khanna reassured.

The District Programme Manager (National Health Mission), Dr. Mathews Numpeli and Sub Collector, Fort Kochi, Dr. Haris IAS, Mr. Sanjay Khanna, Executive Director (Kochi Refinery), Mr. Kurian P Alapatt, Chief General Manager (HR), Mr. Chacko M Jose, Chief General Manager (Operations) and Mr. George Thomas, General Manager (PR & Admin) joined the walk-through with the District Collector, along with KR team members from Manufacturing, Process, Maintenance, Estates, HSE & Public Relations on 15 May 2021.

Team BPCL prays that the pandemic disappears very soon and also wish all people who would have to use the facility a very speedy recovery.

UNITE TO CRUSH THE CURVE PUSH THE PANDEMIC OUT

A LOOK AT THE INITIATIVES AT KOCHI REFINERY DURING THE INITIAL PERIOD, LOCKDOWNS AND THE SECOND WAVE OF COVID 19

Ever since COVID 19 cases were detected first time in India at Thrissur, Kerala, among medical students returning from Wuhan in January 2020, BPCL Kochi Refinery has been meeting the challenges of the pandemic through various community initiatives. The Initiatives come under three periods of the pandemic as detailed below:

INITIAL PERIOD

During the beginning stages, that is by the beginning of February 2020, KR started creating awareness about the disease among employees, contract workers and neighbouring public. We had started establishing different protocols in the work site. We also developed our own hand sanitizer Aroma which is being used all over the refinery.

By the middle of March 2020, we were aware of the gravity of the situation and at that stage, medical experts and National Health Mission had brought to our attention that there is a dearth of Personal Protective Equipment for health workers and shortage of Intensive Care Units.

Based on this input and requests from State Government and Indian Medical Association, Kochi Refinery took up the following initiatives under Corporate Social Responsibility (CSR) in the middle of March itself:

- ICU Units for Government Hospitals of Three Districts:
 - (a) ICU Unit at *Government Medical College, Ernakulam* with three ventilators
 - (b) Seven (7) ventilators for ICU Unit at *Government Medical College, Kannur*
 - (c) Facilities for ICU units at *General Hospital, Pathanamthitta* and *District Hospital, Kozhenchery* of the same district (These four hospitals were identified because Ernakulam, Kannur and Pathanamthitta showed high surge in the initial days)
- PPE kits for health workers and hand sanitisers to public

Continued on next page >>>

LOCKDOWNS & BEYOND

National level Lockdown was declared on 25 March 2020. Starting from this period, KR initiated a range of programmes to reach out to the underprivileged of the society, especially those in the vicinity. BPCL supported various welfare schemes during FY 2020-21. Some of these include:

- **Infrastructure for Government Hospitals:**

- (a) Facilities for inpatient COVID care including patient cots and bed and drip stands for Taluk Head Quarters Hospital, Sulthan Bathery, Wayanad
- (b) Lab Equipment and facilities for neighbouring Primary Health Centre, Maneed,
- (c) Generator sets for Taluk Head Quarters Hospital Kothamangalam catering to COVID Patients
- (d) Renovation and facilities for Casualty Block of Government Hospital, Muvattupuzha, Eastern end of Ernakulam district

- **Strengthening COVID Care Mechanism in Kochi:**

- (a) Support extended to run the COVID 19 War Room of the District that coordinates tracking of COVID contacts, patient admission, tele-medicine etc
- (b) District Administration had converted a closed-down hospital into Government COVID Apex Centre for controlling the surge and extending care in Kochi city and suburbs. BPCL had supported the medicine and consumables for few months
- (c) Fuel Support to Kerala Police for Motor Cycle patrolling
- (d) Support of Covid 19 awareness campaign by District Administration

- **Support to CFLTCs:**

In order to streamline the medical Care, COVID First Line Treatment Centres (CFLTC) were opened by the State Government. Infrastructure support was given to such CFLTCs coordinated by the District Administration and neighbouring Local Self Governments.

- **Direct Support For Poor in Neighbourhood:**

- (a) Food & sanitization kits and medicine for poor in the neighboring areas of Kochi Refinery and its other facilities
- (b) Food kits for migrant labourers in Ernakulam
- (c) Support to Community Kitchen in neighbouring Municipality.

- **Support for Online education for Children of poor families:**

- (a) 500 Television sets for online education for marginalised students in four districts of Kerala
- (b) Television sets at SC/ST centres in neighbouring panchayats

- **Post-COVID Medical Camp:**

National Health Mission initiated a series of medical camps for the poor in the district having Post-COVID complication. BPCL is supporting this effort called as Punarjani Post Covid clinic

- **Liquid Oxygen Supply:**

KR along with its business partner Air Products also supplied Liquid Oxygen when the average daily cases spiked in October-November 2020.

All these schemes were supported under the CSR and Enterprise Social Commitment (ESC) projects of Kochi Refinery. *Continued on next page >>>*

LOCKDOWN PERIOD & BEYOND

KR INITIATED A RANGE OF PROGRAMMES TO REACH OUT TO THE UNDER-PRIVILEGED OF THE SOCIETY, ESPECIALLY THOSE IN THE VICINITY.

SECOND WAVE

KOCHI REFINERY IS FOCUSING ON OXYGEN SUPPLY FOR SOCIETY

COMBATING THE SECOND WAVE OF COVID 19 SPREAD

In the present pandemic situation, Kochi Refinery is mainly focusing on the Oxygen supply for the society. BPCL Kochi Refinery is providing Gaseous Oxygen, power, water and infrastructure to a 500-bed make-shift COVID treatment centre at the old campus of Cochin Refineries School, adjacent to its premises, in Ambalamugal, Kerala. Gaseous Oxygen is being produced in the VPSA Plants at Kochi Refinery. This make shift COVID treatment centre established by Ernakulam District Administration has been expanded to 1,500 beds in phases.

In view of the second surge, BPCL along with its business partner Air Products commenced the supply of medical oxygen from Kochi Refinery again this year from 19 April 2021. BPCL is supplying around 3.5 tonnes per day of Liquid oxygen to Government Hospitals in Ernakulam District from this facility. As of 26 May 2021, 140 Tonnes of Oxygen has been distributed during the second surge. Last year, BPCL supplied 46 tonnes of medical oxygen when the average daily cases spiked in October-November 2020. The build-own-operate (BOO) unit of Kochi Refinery has a provision to produce and store liquid oxygen of 99.7% purity.

Presently we are also supporting many projects from neighbouring Local Self Governments, NGO and other stake holders that include food kits and medicines to COVID Positive and quarantined people from economically and socially backward families, ICU Beds & Ventilators and PPE kits, sanitizers and more.

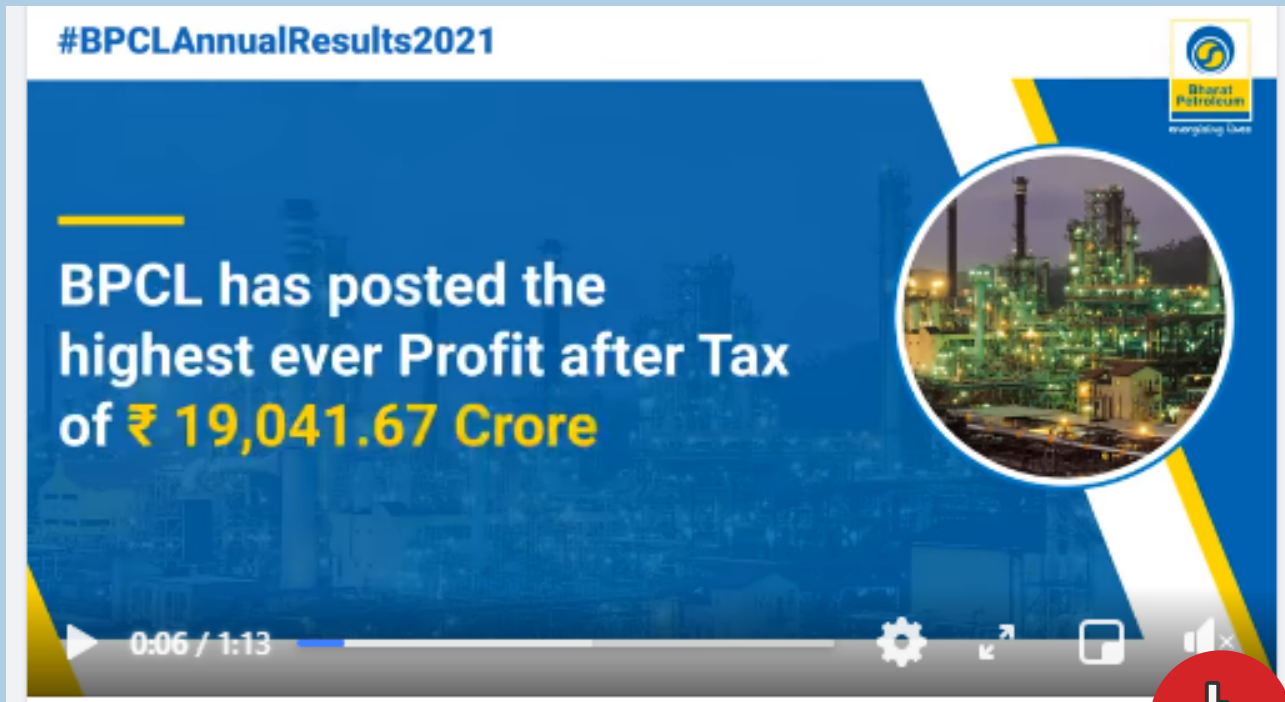

Various groups inside the Refinery are also helping the needy in their communities. When it comes to saving lives, we don't have to think twice, every life is precious. Together let's help in whatever way we can.

CURBING THE CURVE INSIDE THE REFINERY

The biggest challenge we faced inside the Refinery during the second wave of COVID 19 is shortage of employees once the infection started to spread severely. Quick steps taken to alert employees and avert the spread include:

- All mandates of Central, State and Corporate duly noted and complied with
- Virtual meets made mandatory for all office proceedings
- Clear SOPs and guidelines given for employees travelling within the state and outside the state.
- Rescheduling working hours and canteen hours to prevent over-crowding.
- Screening of all employees by means of temperature scanners at Gate and entrance
- Visitors restricted into Refinery premises
- Screening of visitors at occupational health centre
- Constant communication through regular channels, digital and social media platforms for awareness and updates
- Regular fumigation and sanitization of all work sites and premises to prevent spread
- Awareness health talks and regular site visits providing information regarding prevention of spread
- Intervention in office and canteen seating arrangements
- Weekly covid testing facility at OHC for primary contacts of both employees and contract employees.
- CFLTC for employees and dependents with sufficient supply of medicines and Oxygen along with ambulance support activated
- 24/7 working OHC for treatment and medical queries
- Daily follow-up of COVID 19 positive employees and family through tele-consultation by OHC doctors.
- Timely referral of all sick employees and family under quarantine to COVID CARE tertiary centre and ensuring availability of bed, oxygen supply, ventilators and medication.
- Identifying, isolating and testing of all primary and secondary contacts.
- RANDOM COVID-19 testing campaign at regular intervals to keep a check on spread of COVID 19
- Organizing vaccination drives to ensure all groups are vaccinated at the earliest

BPCL POSTS RECORD PERFORMANCE

Despite challenges from COVID19 pandemic, Bharat Petroleum posted highest ever net profit of Rs 19,042 Crore in FY21, while excelling in other physical parameters, as well. 2 ETHYL HEXANOL LAUNCHED AT KOCHI

Moving on a very fast pace and close on heels of the first product, the second one also has been launched from the world class Oxo Alcohol Unit of Bharat Petroleum Propylene Derivative Petrochemical Complex at Kochi Refinery. The 2 ETHYL HEXANOL, which has varied applications in downstream industries, was launched by Mr. Sanjay Khanna, Executive Director (Kochi Refinery) on 07 May 2021. The first dispatch trucks were flagged off by Mr. Suresh John, Chief General Manager (Projects Procurement), Mr. Kurian P Alapatt, Chief General Manager (Human Resources) I/C and Mr. Teekam Singh, Territory Manager (Industrial & Commercial).

Senior executives including Chief General Managers, Mr. Chacko M Jose (Operations), Mr. Ajith Kumar K (Projects), Mr. AN Sreeram (Project Technical & PETCHEM), Mr. S Sriram (Engineering & Advisory Services), Ms. Sarah Thomas (Employee Relations), Mr. Sankar M (Manufacturing), other invitees and team members witnessed the ceremony organised under strict COVID protocol. The first dispatch of 2 Ethyl Hexanol was in three conventional trucks and two ISO containers with a total quantity of 95.92 MT. We appreciate all the new customers for having trust in BPCL product quality from a new unit and thank them for maintaining all the protocols. The OXO ALCOHOL unit, which was commissioned in March 2021, uses LP Oxo Selector 30 technology and the unit, is designed to produce N-Butanol, 2 Ethyl Hexanol and I-Butanol. Of these, 2 ETHYL HEXANOL is particularly required for plasticizers used in PVC processing, specialty plasticizers, co-monomer in polyethylene resins for adhesive, cetane improvers and temperature resistant materials. Conceived and delivered entirely as a *Make in India* project, the BPCL Petrochemical Complex will largely benefit Indian paint, cosmetic, ink, plasticizers and many more downstream industries.

DIGI PLATFORMS GO LIVE AT OXO ALCOHOL UNIT

After the successful commissioning of the PDPP units one after the other, the digital applications are now going on-stream as well. Mr. Sriram S, Chief General Manager (Engineering & Advisory Services) launched the streaming of the digital applications in the presence of Mr. Sanjay Khanna, Executive Director (Kochi Refinery) and other senior BPCL officials at the main control room of the Oxo Alcohol Unit of PDPP on 26 May 2021. The three applications that have gone live are the ePermit, eLog and the LIMS. The e-Log App was inaugurated by Mr. A N Sreeram, Chief General Manager (Project Technical), e-Permit app was inaugurated by Mr. Ramachandran M K, General Manager (HSE) i/c, and the LIMS by Mr. Mahendiran A, General Manager (Petchem Commissioning). With these initiatives, Petchem Units have also essayed the benchmarks set in the digitalization journey of BPCL- Kochi refinery.

BPCL INTERIM DIVIDEND TO GOK

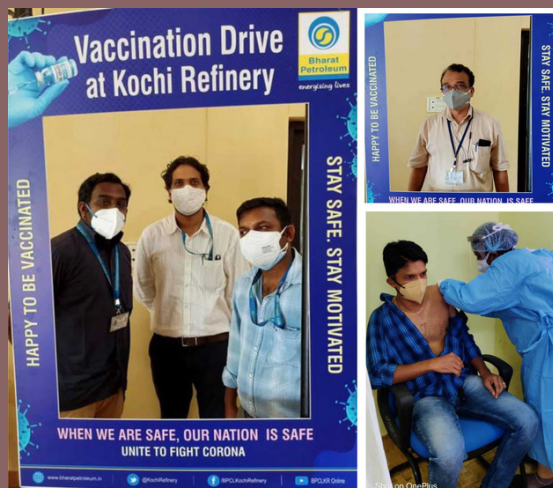

Mr. Sanjay Khanna, Executive Director, (Kochi Refinery) presented the BPCL interim Dividend of Rs.39.20 Crores to Mr. Pinarayi Vijayan, Hon'ble Chief Minister of Kerala in the presence of Dr. K. Ellangovan IAS, Principal Secretary (Industries) & Govt Director, BPCL Board, Mr. Kurian P Alapatt, Chief General Manager (HR), Mr. George Thomas, General Manager (PR & Admin) and Mr. Vinod T Mathew, Manger (PR), Kochi Refinery at the meeting in Thiruvananthapuram on 27 May 2021. The interim dividend of FY 2020-21 is for the 1,86,66,666 BPCL shares held by Government of Kerala.

1000TH RAKE OF PETCOKE FROM KOCHI REFINERY

The 1000th rail rake consisting of 58 Wagons with 3,785.20 Metric Ton Petcoke was flagged off by Mr. Sanjay Khanna, Executive Director (Kochi Refinery) and Mr. Kurian P Alapatt, Chief General Manager I/C (Human Resources) in the presence of Chief General Managers, Mr. Suresh John, (Projects Procurement), Mr. Chacko M Jose (Operations), Mr. Sriram S, (Engg & Advisory Services), Mr. Senthilkumar G (Technology) and Mr. AN Sreeram (Petchem), other KR officials, I&C Officials, team members of BPCL and also the vendor groups on 26 May 2021. This milestone rake was to *The Ramco Cements*, Ariyalur, Tamil Nadu. The total quantity of Petcoke dispatched to date is 3.2 MT, a milestone crossed with the dedicated support from BPCL teams of KR, I&C, I&C Marketing Coordination, I&C Refinery Coordination and Railways.

VACCINATION DRIVE > 45

At the fourth vaccination drive organised by Kochi Refinery at the Ambalamugal Medical Aid Society (AMAS) on 27 May 2021, over 200 employees in the age group 18 to 44 years took the vaccination. This is the first camp for the age group below 45 years. In the above 45 category, around 500 employees and 300 family members have completed their vaccinations in the previous three camps at KR.

The camps by the Occupational Health Centre are being coordinated by Dr. K G Rajendran, Chief Manager (Medical Services). More camps have been scheduled for completing the mass vaccinations of employees and contract staff at Kochi Refinery. As part of the National drive to spread awareness to Unite to Fight Corona, branded selfie-booths were also arranged at AMAS, for employees to take photos and share on social media.

DR LISSIAMMA BIDS ADIEU

Dr. N.K. **Lissiamma** bids adieu to BPCL-Kochi Refinery, after a totally satisfying service of more than 26 years in a Maharatna company. After short stints at TMM Hospital, Thiruvalla, Holy Cross Hospital, Kottayam and few other private hospitals, Dr Lissiamma joined Kochi Refinery as Medical Officer in 1994 and was re-designated as Chief Manager (Medical Services) in June 2017

A totally dedicated, composed and straightforward person, Dr.Lissiamma , bid farewell to Kochi Refinery in March 2021. She expressed that unlike in a hospital set-up, she thoroughly enjoyed her professional stint at KR, with varying experiences of medical emergencies in an Industrial set-up. Over the years, she has developed a strong bond with almost all the employees in Kochi Refinery and also has an excellent rapport with many of the family members too.

There has been a tremendous change in the work culture in Kochi Refinery due to large inflow of employees in different age groups from different States and she feels that the generation gap will soon be bridged.

She conveys sincere gratitude to all in Cochin Refineries School for imparting the best education to her children. Every moment in Kochi Refinery is memorable to Dr. Lissiamma and she is grateful to all her seniors and colleagues for their love, co-operation and support given during her journey through this wonderful organisation.

Her husband Dr. Johnson is working in Samaritan Hospital, Pazhanganad. They are blessed with two children, Jithin and Jeena. Their elder son Jithin Johnson is pursuing his Ph.D in Goa University and their younger daughter Jeena Ann Johnson is preparing for her medical PG examination. They have settled at Pazhanganad, adjacent to Samaritan Hospital. Dr. Lissiamma is very fond of gardening and hopes to spend more time with her orchids and blossoms. She also enjoys all kinds of embroidery and handicraft works. *Jwaladhvani* wishes Dr. Lissiamma and her family beautifully creative, healthy and peaceful days ahead.

BYE FROM LALLY SISTER

A recipient of the President's Guide Award from then President Fakruddin Ali Ahmad in 1977, **Lally Mathew** started her nursing career with the College of Nursing at Lady Hardinge Medical College, Delhi in 1980. With rich experiences in different specialties for over 10 years at various prestigious Institutes in India and abroad like All India Institute of Medical Sciences Delhi, Sree Chithira Thirunal Institute of Medical Science and Technology Trivandrum, Ministry of Health, Saudi Arabia, Lally joined the erstwhile Cochin Refineries Limited in 1995.

A caring, compassionate and empathetic person who deeply loves her profession, Lally Sister bid adieu to KR in April 2021. She faced all challenging problems with a smile and was quick to resolve them with her rich experience. She always emphasized on the importance of maintaining a balance between personal and professional life. A very spiritual person, Lally sister is always ready to motivate others and is a good role model to her juniors.

Lally sister is a native of Koothattukulam. Her husband Jacob Varghese is a builder. They are blessed with two children, Joel and Steffy. Their son Joel Jacob is a Mechanical engineer. After his Post graduation from New Zealand, he is working and settled in Australia with his wife Ann Louiz who is Assistant Director in the Australian Foreign Affairs. Their daughter Steffy Jacob did her BSc in Nursing from Amrita Institute of Medical Sciences and is working at Manchester, UK. She is married to Rijo Kuruvilla who is a software Engineer working in UK. They are blessed with a son Jake Kuruvilla. Lally sister is retiring after 26 years of fruitful service. Following retirement, she wishes to lead a peaceful life and pursue all her hobbies which she was unable to follow during her busy service period. *JwalaDhwani*, wishes Lally sister a peaceful and happy retired life.

Her Address: Cheppannore House, Oliyappuram P O, Koothattukulam, Ernakulam
